

To whom it may concern: I love XM satellite radio. Please don't take away my freedom of choice. it seems that we are becoming a Communist government day by day. Ever since Janet Jackson expose her self on national TV it seems the FCC wants to stop every type of communication out there from Howard Stern to other broadcasters. We all know Collin Powell's son runs the FCC and is part of the Bush Administration. I see a religious agenda here from the Bush Administration that is affecting our freedom. I am a Republican and will vote for John Kerry if my XM Instant Traffic & Weather channels are taken away or any other service that XM provides me at this time. Sincerely Joseph Cavallo
